

SANGILI S

FULL STACK DEVELOPER (MERN & SAAS ARCHITECT)

✉ sangilis423@gmail.com

☎ 9384438060

📍 Dindigul 642308

👤 SUMMARY

Full Stack Developer with **2.5+ years** of experience in designing, building, and deploying multi-tenant **SaaS platforms** and scalable web applications. Deep expertise in **MERN stack** (MongoDB, Express.js, React.js, Node.js) with production success in employee live monitoring, lead management, and hostel management SaaS workflows. Skilled in architecting automated SaaS pipelines, webhook events, real-time messaging, role-based access control (RBAC), and RESTful API ecosystems.

</> SKILLS

SAAS & ARCHITECTURE

Multi-Tenant SaaS • RBAC • Webhooks • Event-Driven Architecture • Microservices • Data Isolation

FRONTEND

React.js • Next.js • TypeScript • JavaScript
HTML5 • CSS3 • Tailwind CSS • Bootstrap
Redux Toolkit • Responsive UI

BACKEND

Node.js • Express.js • PHP • Laravel
RESTful APIs • Socket.io • WebSockets
Authentication (JWT, OAuth 2.0)

DATABASE

MongoDB • PostgreSQL • MySQL

AI, DEVOPS & TOOLS

Git • CI/CD • Postman • Docker • Nginx • PM2
ChatGPT • Gemini • Claude • GitHub Copilot

🧠 SOFT SKILLS

- SaaS Workflow Design
- Problem Solving
- Troubleshooting
- Debugging
- Communication
- Adaptability
- Agile & Scrum
- Requirement Analysis
- Sprint Planning
- Cross-Team Collab
- Time Management
- System Scalability

🎓 EDUCATION

Master of Computer Applications (MCA)

Dr SNS Rajalakshmi College of Arts and Science

Coimbatore, Tamil Nadu

04/2024

Bachelor of Science in Information Technology

G.T.N Arts College

Dindigul, Tamil Nadu

06/2022

📁 EXPERIENCE

08/2025 – 08/2026 Software Developer

ICore Software Technologies • Coimbatore

- Architected and scaled an enterprise **Employee Live Monitoring SaaS** platform delivering real-time productivity metrics, screen activity logs, and automated attendance workflows.
- Engineered bi-directional communication channels using **WebSockets & Socket.io** for instant telemetry sync and real-time live staff monitoring dashboards.
- Implemented high-throughput **Webhooks** to automate external notifications, event triggers, and automated reporting pipelines across tenant accounts.
- Engineered modular **MERN** backend micro-services with secure tenant data isolation, role-based access control (RBAC), and RESTful API endpoints.

10/2024 – 08/2025 Full Stack Developer

Litztech India Private Limited • Coimbatore

- Engineered a cloud-based **Lead Management SaaS** platform featuring multi-stage sales funnels, lead routing automation, tracking workflows, and dynamic conversion analytics.
- Developed a comprehensive **Hostel Management SaaS** solution handling tenant onboarding, room allocations, automated billing/invoicing, and digital check-in workflows.
- Built responsive, high-performance UI dashboards using **React.js, Next.js, and TypeScript** integrated with Laravel and Node.js backends.
- Integrated payment gateways, automated SMS/email alert triggers, and third-party CRM webhook synchronization.

05/2023 – 05/2024 Junior Backend Developer

Aegiiz Technologies • Coimbatore

- Constructed backend modules and relational database schemas using **PHP, Laravel, and CodeIgniter**.
- Designed performant RESTful APIs, query optimization for MySQL, and integrated third-party payment/messaging services.
- Assisted in end-to-end CI/CD deployments, server maintenance, and production environment debugging.

★ KEY SAAS & PROJECT HIGHLIGHTS

Employee Live Monitoring SaaS (ICore): Real-time workplace monitoring platform with automated activity tracking, screenshot capturing, idle-time detection, and live manager analytics dashboards.

Lead Management SaaS (Litztech): End-to-end lead lifecycle workflow engine featuring automated assignment rules, WhatsApp/SMS triggers, pipeline stage progression, and conversion KPIs.

Hostel Management SaaS (Litztech): Multi-property accommodation platform automating bed inventory, fee collection workflows, tenant KYC, and maintenance ticket lifecycles.

Event-Driven Webhook Pipelines: Engineered asynchronous webhook architectures connecting third-party CRMs, payment webhooks, and real-time business notification triggers.

Real-Time Conversation & Sync Workflows: Developed low-latency messaging and collaboration modules using WebSockets for multi-tenant customer communication.

Secure Multi-Tenant Architecture: Designed schema-level and tenant-keyed data partitioning, RBAC security, JWT token authentication, and encrypted API communications.
